

PROFESSIONAL SKILLS

APPLICATIONS

OTHER SKILLS

Hello! I'm eager to incorporate my skills of **INTEGRATING ARTS** with **interactivity**

A **Creative Technologist** based in Richmond, BC, with 5+ years of experience using **Adobe Creative Suite**. While I participated in different projects, I consider myself a **graphic designer** at heart. This is because nothing is more fun for me than making a great design out of nothing. Even when the results are far away from what I originally planned to. I find this process of designing entertaining because each **design tells a story**. Good design also **captivates** the audience, while **appreciates** and **honours** them. Every word, every colour, every font and every icon brings narrative to this thing that called design. But, of course, integrating arts with interactivity allows the design to interact with the audience and is brought into life by graphic designer.

NEW MEDIA+WEB DESIGN

LEAD WEB DESIGNER

2016- present

LIVETALENT(VOLUNTEER)

- Conceptualized and designed website to reflect rebranding.
- Worked with an executive team to ensure unified approach.
